

TechCare Health Solutions

Capabilities Statement · Custom Healthcare Software & Health IT

ONE PAGE

TechCare Health Solutions designs and delivers secure, interoperable healthcare software and technology projects for health systems and government agencies. Our ability to build strong custom healthcare software is grounded in more than two decades of healthcare experience spanning data analytics, quality and patient safety, risk management, and operational excellence. We focus on solutions that improve care delivery, data exchange, quality programs, and operational performance—with documentation suited to formal procurements.

OUR FOUNDATION — 20+ YEARS

Data analytics

Healthcare data analytics that inform clinical and operational decisions.

Quality & patient safety

Quality measurement and patient-safety perspective in every design.

Risk management

Risk-aware delivery aligned to clinical, operational, and compliance needs.

Operational excellence

Reliability, clarity, and continuous improvement engineered into delivery.

CORE COMPETENCIES

- Custom healthcare software & workflow applications
- Interoperability: HL7, FHIR, APIs, and EHR/HIE connectivity
- Population health, quality analytics & reporting
- Value-based care and Medicaid-aligned program support tools
- Remote patient monitoring & telehealth enablement
- Cloud architecture, security controls & HIPAA-minded design
- Data platforms and responsible, scoped AI assistance

COMPANY DATA

Legal name	TechCare Health Solutions
Website	techcarehealthsolutions.com
Primary contact	info@techcarehealthsolutions.com
Federal registration	SAM.gov registration in progress — identifiers available on request
Capability alignment	Custom software, systems design & integration, and related healthcare IT services (NAICS-aligned; codes on request)

- Products: **CheckMyVitals** (remote patient monitoring — checkmyvitals.com) and **Adantai** (population health / quality for health plans & health systems — adantai.com)

DIFFERENTIATORS

Custom by design

Solutions shaped around your clinical, public-health, and procurement realities—not generic product shelves.

Interop & privacy first

HL7/FHIR exchange patterns and HIPAA-aligned safeguards built into architecture from the start.

Proposal-ready clarity

Transparent written capabilities for RFPs and capability reviews—without overstating registrations or certifications.

TYPICAL BUYERS & USE CASES

- Federal, state, and county health agencies
- Medicaid and public health program offices
- Health systems and their implementation partners
- Modernization, integration, analytics, and care-extension projects

HOW WE ENGAGE

- Discovery-led scoping for custom healthcare builds
- Interop-aware HL7 / FHIR architecture
- HIPAA-minded security and privacy controls
- Documentation suited to agency reviews and hand-off
